

### Progress Report 2021

### Uttar Pradesh

(Based on NIF Progress Report 2021 by MoSPI)

To measure progress of SDGs at national level during 2015-2030, there was requirement of base value at the beginning of SDGs era which will act as a reference point to measure performance and progress against the value of indicators in subsequent years. The base-year is taken as the year 2015-16 or the year prior to that for which the data is available. For very few indicators, the first (base) data is provided as the year after 2015-16 considering the non-availability of data for the indicator(s) in the previous years. The value of indicators from the base year can then be used to monitor and evaluate the progress of the national indicators over the years till 2030.

The "SDGs National Indicator Framework Progress Report, 2021" highlights the progress made so far in the journey of SDGs monitoring/achievement at national level and also identifies the gaps.

Based on the report, Department of Planning, Govt of Uttar Pradesh prepared the report for state to present the achievements vis a vis achievement at the country level for each of the indicators.

#### National Indicator Framework

Monitoring and evaluation are essential for assessing the extent to which policies and resource allocations for implementing the SDGs result in meaningful outcomes. It is evident that reliable data is the backbone for better monitoring of SDGs and also require for data driven decision making policies. Taking into account the complex and interconnected nature of the SDGs, Government of India started working on a sound monitoring and evaluation framework. Stakeholders' participation is critical to ensure that national priorities for SDG implementation are understood and accepted.

Towards this endeavor, the Ministry of Statistics and Programme Implementation (MoSPI), Government of India developed a National Indicator Framework (NIF) in 2018 consisting of 306 national indictors along with identified data sources and periodicity following due consultation process with concerned Ministries / Departments, UN Agencies and other stakeholders. NIF is the backbone for facilitating monitoring of SDGs at the national level and provides appropriate

direction to the policy makers and the implementing agencies of various schemes and programmes. Presently, at national level, data flow from National Statistical Office and nearly 30 data source Ministries/Departments are involved in the process of providing data on SDGs. MoSPI coordinates with these line Ministries for institutionalizing the data flow for SDG indicators. At present, there are 295 indicators in the NIF (Version 3.1)

Nationa	I Indicator Fra	mework - A	Comparison
