SDG 1

No Poverty

Sustainable Development Goal 1 aims to end poverty in all its forms everywhere. It is important to mention here that poverty needs to be perceived beyond lack of income and resources to ensure sustainable livelihood. Extreme poverty today is concentrated and overwhelmingly affects large rural populations and increasingly it is exacerbated by violent conflicts and climate change. Even in urban areas the slum population is growing rapidly due to in-migration of population, both skilled and unskilled, in search of various economic and employment opportunities which is largely concentrated in urban settlements. Effective social protection schemes and policies, along with government spending on key services, can help those left behind get back on their feet and find a way out of extreme poverty.

SDG 2

Zero Hunger

Sustainable Development Goal 2 aims to end all forms of hunger and malnutrition by 2030, ensuring that all people, especially children, have access to sufficient and nutritious food all year round. It seeks to end all forms of malnutrition, double agricultural productivity and ensure sustainable food production systems.

Eradicating hunger requires policy action that is multidimensional in approach. Depending on the specific context of a country, the requirements can range from increasing agricultural productivity and accessing markets, to investing in family farming, small-scale fisheries and forestry, to fostering governance of land tenure and natural resources, to strengthening nutrition-sensitive social.

		2021-22	99.31

SDG 3

Good Health and Well-Being

Sustainable Development Goal 3 aims to ensure that people enjoy a level of health that enables them to lead a socially and economically productive life. It aims to end preventable deaths across all ages from communicable and non-communicable diseases and illnesses caused by air, water, and soil pollution. It also aims to achieve universal health coverage, including financial risk protection, access to quality essential health care services and access to safe, effective, quality and affordable essential medicines. It also calls for a renewed focus on mental health issues.

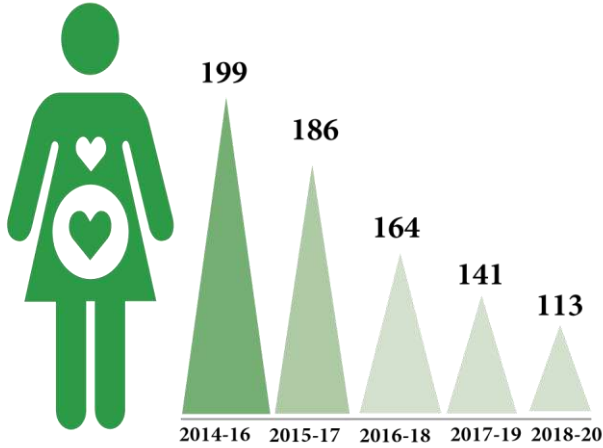

Health systems are facing critical capacity and financial gaps to meet the challenges of ageing population, non-communicable diseases, cross border epidemics, environmental pollution, climate change and natural disasters. Therefore, there is a need of urgent interventions to deal with the situation of health status of all.

SDG 4

Quality Education

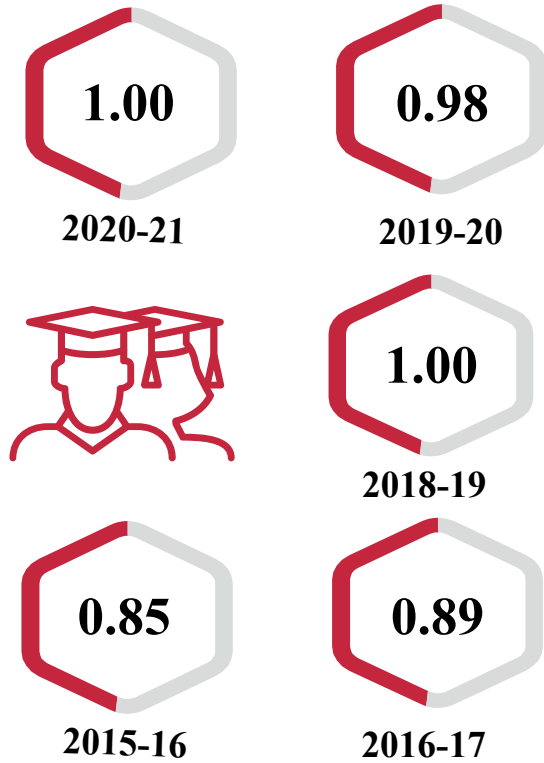

Goal 4 aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. This goal supports the reduction of disparities and inequities in education, both in terms of access and quality. It recognizes the need to provide quality education for all, and most especially vulnerable populations, including poor children, children living in rural areas, persons with disabilities.

This goal is of critical importance because of its transformative effects on the other SDGs. Sustainable development hinges on every child receiving a quality education. When children are offered the tools to develop to their full potential, they become productive adults ready to give back to their communities and break the cycle of poverty. Education enables upward socioeconomic mobility.

SDG 5

Gender Equality

SDG 5 aims to achieve gender equality by ending all forms of discrimination, violence, and harmful practices, including trafficking and sexual exploitation of women and girls. It calls for valuing women’s unpaid care and domestic work on the one hand and for full and effective participation and equal opportunities for leadership at all levels of decision-making in political, economic, and public life for them.

Providing women and girls with equal access to education, health care, decent work and representation in political and economic decision-making processes will achieve sustainable economies and will benefit societies and humanity at large. It is vital to give women equal rights on land and property, sexual and reproductive health and to technology and the internet. Today there are more women in public offices than ever before which will help to achieve gender equality.

Clean Water and Sanitation

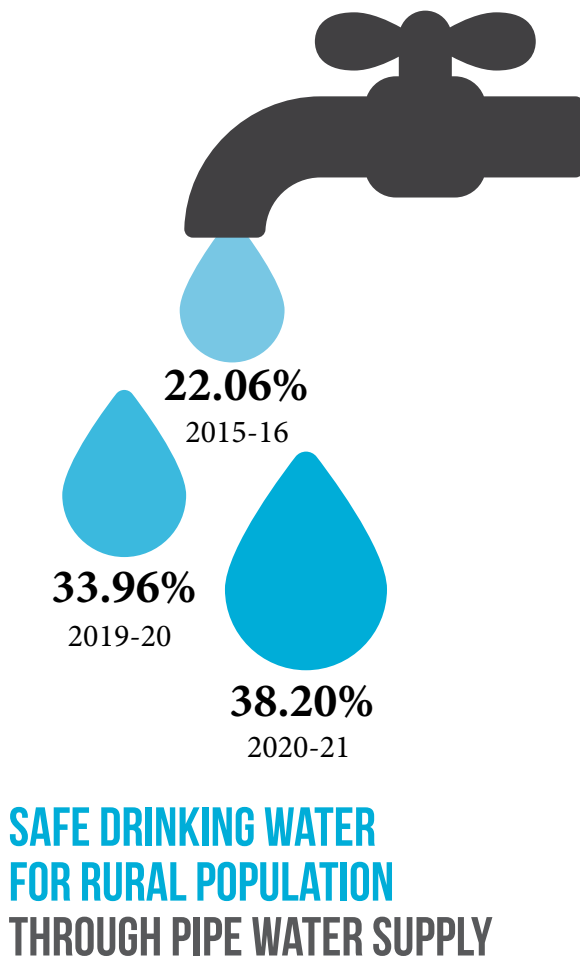

Goal 6 aims to ensure availability and sustainable management of water and sanitation for all. Water and sanitation are critical to the health of people and the planet. Goal 6 not only addresses the issues relating to drinking water, sanitation and hygiene (WASH), but also the quality and sustainability of water resources worldwide. Improvements in drinking water, sanitation and hygiene are essential for progress in other areas of development too, such as nutrition, education, health and gender equality.

The natural environment e.g. forests, soils and wetlands contribute to management and regulation of water availability and water quality. Water shortages undercut food security and the incomes of rural farmers while improving water management makes national economies, the agriculture and food sectors more resilient to rainfall variability and able to fulfil the needs of growing population. Protecting and restoring water-related ecosystems and their biodiversity can ensure water purification and water quality standards.

SDG 7

Affordable and Clean Energy

Goal 7 aims to ensure access to affordable, reliable, sustainable and modern energy for all. Energy is the key input in economic growth and in improving quality of life. Energy growth is closely linked to level of well-being and prosperity of a nation. Modern energy needs involve a wider spectrum of activities from electricity consumption towards access to transport, communication, information technology, sanitation and hygiene, nutrition and cooking, illumination, thermal comfort, connectivity to enable conducting productive activities and basic social comfort.

Sustainable energy measures provide considerable benefits in reducing indoor air pollution and related health risks. Indoor air pollution, largely caused by the burning of solid fuels, suffer lasting damage to their brains and lungs.

SDG 8

Decent Work and Economic Growth

Goal 8 aims to promote inclusive and sustainable economic growth, full and productive employment and decent work for all. Sustainable economic growth will require societies to create the conditions that allow people to have quality jobs that stimulate the economy while not harming the environment. SDG 8 for Decent Work and Economic Growth therefore, aims to achieve higher levels of economic productivity, diversification and technological innovation while ensuring inclusive decent work for all. It means aiming to promote development-oriented policies that support decent job creation, entrepreneurship, creativity and innovation. It also seeks to protect labour rights and promote safe and secure working environments for all workers.

SDG 9

Industry, Innovation and Infrastructure

Goal 9 aims to build resilient infrastructure, achieve sustainable industrialization and promote scientific innovation and research. Developing infrastructure like roads, information and communication technologies, sanitation, electrical power and water along with promotion of science and technology including IT, a scientific temper and constant innovation are important for towards fulfilling the aims of SDG 9.

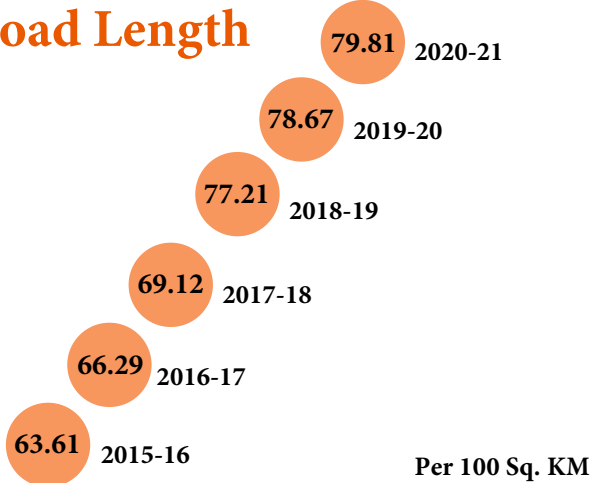

Investments in infrastructure – transport, irrigation, energy, and information and communication technology – are crucial in achieving sustainable development and empowering communities. It has long been recognized that growth in productivity and incomes, and improvements in health and education outcomes require adequate investment and proper infrastructure. Further manufacturing and industry is recognised as a key driver of economic development, gainful employment.

SDG 10

Reduced Inequalities

Goal 10 aims to reduce inequality within and among countries. Sustainable Development Goal 10 on Reduced Inequalities calls for progressively reducing not only income inequalities but also inequalities of outcome by ensuring access to equal opportunities and promoting social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, religion or other status relevant within a society. The Goal also aims to enhance representation and voice for developing countries in decision making in international institutions.

To reduce inequality, policies should be universal in principle, paying attention to the needs of disadvantaged and marginalised populations. Inclusion has to be promoted actively, in social as well as political spheres, for all ages, sexes, races, religions and ethnicities to create conditions of equity within countries.

SDG 11

Sustainable cities and Communities

Goal 11 aims to enhance sustainable urbanization with successful management of cities with ensuring access to safe and affordable housing and basic services to the people by 2030. Its mission is to reduce the adverse per capita environmental impact of cities through the planned development.

There is a need of overall development of integrated urban policy and its implementation at individual cities and towns and it involves hinterland and rural areas too in regional framework. It requires massive investment in urban infrastructure, capacity building of the urban planners and city functionaries and participatory involvement of civic societies. The creation of infrastructure for safe and affordable human settlement and urban basic services in the cities and towns to all especially the poor and disadvantaged group is achievable as per the target of Goal 11.

SDG 12

Responsible Consumption and Production

Goal 12 aims to promote responsible consumption and production, resource and energy efficiency, and development of sustainable infrastructure.

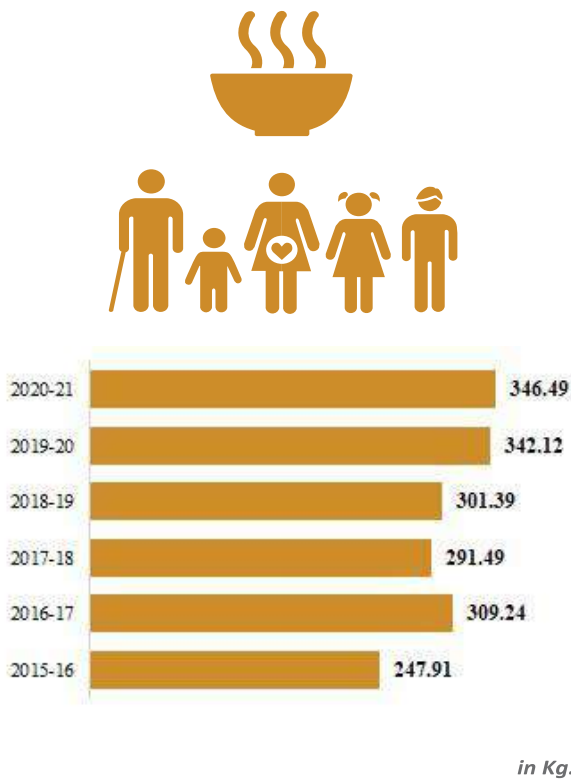

Goal 12 on Sustainable Consumption and Production emphasizes on “doing more with less” thereby ensuring that the needs of the present generation are fulfilled without compromising the needs of the future generation. This Goal emphasizes promoting resource efficiency, green economies and sustainable infrastructure. It also focuses on reducing degradation and pollution and minimizing waste. It calls for environmentally sound management of chemicals and all wastes throughout their life cycle, efficient use of natural resources, as well as ensuring spread of information and awareness on sustainable practices and lifestyles.

SDG 13

Climate Action

SDG 13 aims to integrate climate change measures into national policies and strategies; and further aims to plan and promote mechanisms for raising capacity for effective climate change-related planning and management. Nations across the world are experiencing effects of climate change.

This Goal covers action to mitigate climate change, as well as adaptation efforts, and the promotion of resilience and institutional capacity to address issues relating to changing climates. Each of the targets under Goal 13 will be crucial to creating a global community which seriously addresses climate change and its effects.

<i>Target 13.3: Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning.</i>				
<i>Indicator not yet evolved</i>				
<i>Target 13.a: Implement the commitment undertaken by developed-country parties to the United Nations Framework Convention on Climate Change to a goal of mobilizing jointly \$100 billion annually by 2020 from all sources to address the needs of developing countries in the context of meaningful mitigation actions and transparency on implementation and fully operationalize the Green Climate Fund through its capitalization as soon as possible.</i>				
<i>Indicator not yet evolved</i>				
<i>Target 13.b: Promote mechanisms for raising capacity for effective climate change-related planning and management in least developed countries and small island developing States, including focusing on women, youth and local and marginalized communities.</i>				
<i>Indicator not yet evolved</i>				

SDG 14

Life Below Water

Sustainable Development Goal 14 aims to protecting water ecosystems and preserving water resources. The biodiversity of life below water is already under threat due to plastic pollution and overfishing by human populations. Issues of pollution and acidification will only be exacerbated by climate change if we do not act now to save our water resources.

Establishing comprehensive, effective and equitably managed systems of government-protected areas should be pursued to conserve biodiversity and ensure a sustainable future for the fishing industry.

We should eliminate plastic usage as much as possible and organize coasts clean-ups. Most importantly, we can spread the message about how important life below water and why we need to protect it.

Sustainable Development Goal (SDGs)

Target 14.6: By 2020, prohibit certain forms of fisheries subsidies which contribute to overcapacity and overfishing, eliminate subsidies that contribute to illegal, unreported and unregulated fishing and refrain from introducing new such subsidies, recognizing that appropriate and effective special and differential treatment for developing and least developed countries should be an integral part of the World Trade Organization fisheries subsidies negotiation.

Not Applicable

Target 14.7: By 2030, increase the economic benefits to small island developing States and least developed countries from the sustainable use of marine resources, including through sustainable management of fisheries, aquaculture and tourism.

Not Applicable

Target 14.a: Increase scientific knowledge, develop research capacity and transfer marine technology, taking into account the Intergovernmental Oceanographic Commission Criteria and Guidelines on the Transfer of Marine Technology, in order to improve ocean health and to enhance the contribution of marine biodiversity to the development of developing countries, in particular small island developing States and least developed countries.

Not Applicable

Target 14.b: Provide access for small-scale artisanal fishers to marine resources and markets.

Not Applicable

Target 14.c: Enhance the conservation and sustainable use of oceans and their resources by implementing international law as reflected in the United Nations Convention on the Law of the Sea, which provides the legal framework for the conservation and sustainable use of oceans and their resources, as recalled in paragraph 158 of "The future we want".

Not Applicable

SDG 15

Life on Land

Sustainable Development Goal 15 seeks to protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss. Preserving diverse forms of life on land requires targeted efforts to protect, restore and promote the conservation and sustainable use of terrestrial and other ecosystems. Goal 15 focuses specifically on managing forests sustainably, restoring degraded lands and successfully combating desertification, reducing degraded natural habitats and ending biodiversity loss.

Goal 15 also highlights how these systems contributes to reducing risks of natural disasters such as floods and landslides, maintain productivity of agricultural systems while also regulating climate. It also seeks that concerted action is needed to protect, restore and promote terrestrial ecosystems.

SDG 16

Peace, Justice and Strong Institutions

Goal 16 aims to promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels. Peace, stability, human rights and effective governance, based on the rule of law, are prerequisite for sustainable development.

It also find enduring solutions to conflict and insecurity but also aims to end abuse, exploitation, trafficking, corruption and bribery; develop effective, accountable and transparent institutions and ensure inclusive and representative decision making at all levels.

SDG 17

Partnerships for the Goals

Goal 17 aims to strengthen the means of implementation and revitalize the global partnership for sustainable development. Goal 17 calls to strengthen the means of implementation and to build and enhance partnerships with diverse stakeholders.

Achieving sustainable development cannot be done by a single organization or government alone. Hence, successful sustainable development agenda requires partnerships between governments, private sector and civil society. These inclusive partnerships are needed at the global, regional, national and local level and should be built upon principles and values with shared vision, and shared goals that place people and the planet at the centre.

Sustainable Development Goal (SDGs)

Indicator No.	Detail	Year	Value
<i>Target 17.1: Strengthen domestic resource mobilization, including through international support to developing countries, to improve domestic capacity for tax and other revenue collection.</i>			
17.1.1	Total government revenue as a proportion of GDP, by source (in percentage). Source: DES/ Periodicity: Annual	2015-16	14.72
		2016-17	14.33
		2017-18	15.29
		2018-19	15.13
		2019-20	14.03
		2020-21	13.17
		2021-22	15.10
<i>Target 17.2: Developed countries to implement fully their official development assistance commitments, including the commitment by many developed countries to achieve the target of 0.7 per cent of gross national income for official development assistance (ODA/GNI) to developing countries and 0.15 to 0.20 per cent of ODA/GNI to least developed countries; ODA providers are encouraged to consider setting a target to provide at least 0.20 per cent of ODA/GNI to least developed countries.</i>			
Indicator not yet evolved			
<i>Target 17.3: Mobilize additional financial resources for developing countries from multiple sources.</i>			
Indicator not yet evolved			
<i>Target 17.4: Assist developing countries in attaining long-term debt sustainability through coordinated policies aimed at fostering debt financing, debt relief and debt restructuring, as appropriate, and address the external debt of highly indebted poor countries to reduce debt distress.</i>			
Indicator not yet evolved			
<i>Target 17.5: Adopt and implement investment promotion regimes for least developed countries.</i>			
Indicator not yet evolved			
<i>Target 17.6: Enhance North-South, South-South and triangular regional and international cooperation on and access to science, technology and innovation and enhance knowledge-sharing on mutually agreed terms, including through improved coordination among existing mechanisms, in particular at the United Nations level, and through a global technology facilitation mechanism.</i>			
Indicator not yet evolved			
<i>Target 17.7: Promote the development, transfer, dissemination and diffusion of environmentally sound technologies to developing countries on favourable terms, including on concessional and preferential terms, as mutually agreed.</i>			
Indicator not yet evolved			
<i>Target 17.8: Fully operationalize the technology bank and science, technology and innovation capacity-building mechanism for least developed countries by 2017 and enhance the use of enabling technology, in particular information and communications technology.</i>			
Indicator not yet evolved			

Sustainable Development Goal (SDGs)

Indicator No.	Detail	Year	Value
<i>Target 17.9: Enhance international support for implementing effective and targeted capacity-building in developing countries to support national plans to implement all the Sustainable Development Goals, including through North-South, South-South and triangular cooperation.</i>			
Indicator not yet evolved			
<i>Target 17.10: Promote a universal, rules-based, open, non-discriminatory and equitable multilateral trading system under the World Trade Organization, including through the conclusion of negotiations under its Doha Development Agenda.</i>			
Indicator not yet evolved			
<i>Target 17.11: Significantly increase the exports of developing countries, in particular with a view to doubling the least developed countries' share of global exports by 2020.</i>			
17.11.1	Share of State exports in National exports. Source: Ministry of commerce and Industry & DES / Periodicity: Annual	2015-16	2.10
